April 11, 2011

To Whom it may concern,

We wish to express our great condolences for all victims suffered from the 'East Japan Earthquake', occurred on March 11th, 2011

1 month has passed since the disaster occurred on March 11, 2011.

Our factory and part of our sub-contractors have suffered from it but having much help and great support from many customers and concerned people, our production capability had been recovered, from March 28, to the status before the earthquake but we suffered again by another earthquake occurred on the night of April 7, which was lower 6 on the Japanese intensity scale.

Fortunately, none of our employees were injured and they are working at our factory as usual but due to the earthquake, office and factory buildings got cracks on their walls, equipment has moved its position again.

Having support from Kurimoto group, we are doing our best to restart our production. We apologize for not answering your queries sufficiently but your kind consideration and understanding would be much appreciated.

We renew our pledge that we will do our best to realize 'Recovery' and 'Reconstruction'

Thank you very much for your continuous support to us in advance.

We keep reporting the situation upon progress.

MOTOYAMA ENG., WORKS. LTD.
